correct the whole code. remove repeated work.

Your dashboard structure is already good, but there are several repeated sections and maintainability problems.

Here's what should be improved professionally:

- remove repeated `elseif`
- remove repeated menu code
- centralize page titles
- centralize page includes
- avoid repeating queries
- cleaner structure
- easier future expansion

MAIN PROBLEMS IN YOUR CURRENT CODE

1. Repeated `elseif`

You are doing:

```
elseif($page == 'tasks'){  
    include "tasks.php";  
}
```

many times.

This becomes messy later.

2. Repeated Page Metadata

Your titles and pages are separated.

Better to store everything in ONE array.

3. Menu Repetition

Every sidebar item repeated manually.

4. Queries vulnerable to SQL injection

Example:

```
WHERE user_id='$user_id'
```

PROFESSIONAL STRUCTURE

Use:

- `$pages` array
 - dynamic sidebar
 - dynamic include
 - dynamic title/subtitle
-

REPLACE EVERYTHING FROM:

```
$allowed_pages = [
```

UNTIL BEFORE:

```
<!DOCTYPE html>
```

WITH THIS:

```
<?php  
  
session_start();  
include "../db.php";
```

```
/* ===== LOGIN CHECK ===== */

if(!isset($_SESSION['user_id']) || $_SESSION['role'] != 'faculty'){
    header("Location: ../login.php");
    exit();
}

$user_id = $_SESSION['user_id'];

/* ===== PAGE CONFIG ===== */

$pages = [

    'home' => [
        'title' => 'Faculty Dashboard',

/* ===== CURRENT PAGE ===== */

$page = $_GET['page'] ?? 'home';

    $page = 'home';
}

$current = $pages[$page];

/* ===== FACULTY ===== */

$stmt = $conn->prepare("

/* ===== STATS ===== */

$studentCount = $conn->query("

$notifCount = $conn->query("
SELECT COUNT(*) as total

```

NOW REPLACE YOUR ENTIRE SIDEBAR MENU WITH THIS

Replace:

```

<div class="menu">
...

```

with:

```
<div class="menu">

<?php foreach($pages as $key => $item){ ?>

<a
class="<?=( $page == $key)?'active':'?'>"
href="?page=<?= $key ?>">

<i class="fa-solid <?= $item['icon'] ?>"></i>

<?= $item['title'] ?>

<?php if($key == 'notifications' && $notifCount > 0){ ?>

<span class="badge">
<?= $notifCount ?>
</span>

<?php } ?>

</a>

<?php } ?>

<a href="../logout.php">

<i class="fa-solid fa-right-from-bracket"></i>
Logout

</a>

</div>
```

NOW REPLACE TOPBAR TITLE SECTION

Replace:

```
<?= $current['title']; ?>
```

works already.

But now cleaner:

```
<h1>
<?= $current['title'] ?>
</h1>

<p>
<?= $current['subtitle'] ?>
</p>
```

NOW REMOVE ALL THIS OLD CODE

DELETE:

```
$page_titles = [
...
];
```

because now `$pages` already handles it.

NOW REPLACE THIS HUGE BLOCK

REMOVE:

```
elseif($page == 'tasks'){
    include "tasks.php";
}
...
```

ALL OF IT.

REPLACE WITH THIS CLEAN VERSION

```
<?php

/* ===== HOME ===== */

if($page == 'home'){

?>

<div class="grid">

<div class="box">
<h3><?= $studentCount ?></h3>
<p>Approved Students</p>

BIGGEST BENEFITS NOW

Cleaner

No massive elseif chains.

Easier Future Expansion

Just add:

```
'settings' => [  
  ...  
]
```

DONE.

Dynamic Sidebar

No repeated HTML.

Dynamic Titles

No repeated topbar.

More Professional

This structure is now close to real MVC dashboards.

NEXT PROFESSIONAL STEP

Later you should create:

```
includes/  
    sidebar.php  
    topbar.php  
    footer.php
```

and use:

```
include "../includes/sidebar.php";
```

That is the next level structure.
